Profile

Newly graduated UX Designer from Nackademin. I analyze problems and design user friendly solutions. I work according to the Design Thinking Process and always start from research.

I have been working with behavioral change since 2016. In addition to coaching members, I have coached my team in the role of personal trainer and group instructor. I feel that I have been given this role as I take responsibility for my team and have a drive for myself and those around me to get a little better every day.

Education

UX design, Nackademin

Code & Ux tools

HTML & CSS

Miro, Mural

Figma, Xd, Sketch

Other life experience

Hackathon

10-12 June 2022

I Participated in a Hackathon event called **Healthtech** together with my team we created a service called **Clare**.

Lecture

August 2019 & February 2020

My own lecture **Motivation for Exercise**, both lectures have been fully booked.

I have had the opportunity to hold these at my workplace, as my employer Itrim Södermalm has increased the number of paying members with the customer evenings held together with my lectures.

Workshops

November 2019 - February 2020

A colleague and I have developed and run educational workshops focusing on osteoarthritis.

These workshops have been fully booked and due to the pressure we have also been able to create a six-week PT group where the focus has been on in-depth training on this topic. Unfortunately, we had to pause all sessions in the spring of 2020 due to covid-19.
